Response of Exxon Research and Engineering Company

1. Yes. Beginning in February 1979 ER&E sold waste mixed solvents and flammable solvents to two business entities -- Hudson Oil Refining Corporation and All County Environmental Service Corporation operating facilities at 1 River Road, Edgewater, New Jersey. Attached as "Exhibit A" is a summary of shipments including quantity and date. It is our understanding that the materials were to be utilized as a fuel component and were not sent to the facility for disposal or treatment.

In addition, beginning in November 1975 through November 1978 ER&E sold similar materials to Newtown Refining Company and Hudson Oil Refining Corporation, however, the address of the facility for both entities was 37-80 Review Avenue, Long Island City, New York 11101. Since the facility address is not the one specified in your letter, I have not provided details on these shipments.

2. The materials sent to the 1 River Road, Edgewater, New Jersey facility were mixtures of hydrocarbons and hydrocarbon solvents resulting from research and development activities in laboratory and petroleum pilot plant operations. The quantities are listed on Exhibit A.

3. ER&E did not transport the materials. The information requested is contained in Exhibit B.

4. See Exhibit A and Exhibit B.

5. Documents attached.

We have attempted to enhance the legibility of the documents submitted. Where a document has been enhanced, one untouched copy is attached to a duplicate enhanced copy. A list of the individuals who prepared each document is included on Exhibit A. Their job title is shown on Exhibit C.

6. We have attached a copy of the 1983 and 1984 Generators Annual Report. These documents provide the basic information you requested. The types and quantities of materials generated have not significantly changed during the 1972 - 1982 period.
